Review

Urs Oberdorf wrote the assignment about race conditions. In my opinion the mechanism of race conditions are explained in a good way. The examples are very good to understand the thematic in an easy way, even for people that had never to deal with race conditions. I like that you explained used acronyms e. g. TOCTOU and that the paper is written in a very understandable English. Urs used only book sources and no Internet source, which is i think is very good. Because I think book sources are more trustworthy than on-line sources.

All in all I think the assignment is passed very well.

Grade: **pass**
