Review of: 01_140153_Nesslinger

Assignment

Imagine and electronic ID system and think about two (or more) race conditions and possible solutions for them.

Review

Both listed problems are race conditions and the listed countermeasures do address to them.

The presentation is fairly well done, creating no problems to understand still not being too abstract.

The used references are mainly websites, but contains more than one book as references (from the lecture material).

Just an observation: you could use better formating for the text, just so it would look better to read.

Mark: Pass
